Liposome CFT

4 oz. jar

Cosmetic Surgery Suppliers, Inc. is pleased to introduce a revolutionary product. Liposome CFT is a scientific breakthrough in controlling unsightly cellulite. Aminophylline, the key ingredient used in most slimming creams today, breaks down the fat so that it may be transported out of the body. Unlike other creams that have a 2% concentration, Liposome CFT has a 2.5%, the maximum concentration that will not cause skin irritation. What makes Liposome CFT different from the others is the added benefit of three other ingredients which increase the effectiveness & efficiency of the Aminophylline.

- L-Carnitine is a natural by-product of choline, which helps to prevent fatty deposits.
- Co-enzyme A is an important catalyst in penetrating the skin & fatty tissue.
- Aloe, being the primary ingredient in Liposome CFT, (as opposed to water as in the other similar products), plus Glycerin and other natural extracts makes this slimming cream soothing to the skin, as well as moisturizing.

Dermal-K

A Vitamin K Cream that promotes healing and reduces bruising this cream utilizes a unique all natural dermaceytical delivery system that is now available from Cosmetic Surgery Suppliers, Inc.

Used to treat spider veins, promote normal healing, reduce bruising, relieve pain and inflammation in wounds. Dermal K, also may be helpful in treating burns, surface ulcers, cuts, abrasions, and skin irritation. The all natural ingredients have a synergistic effect and it is this combination which stimulates epithelial growth and promotes healthy granulation and clarifying of injured skin.

The use of Vitamin K injections to treat bleeding problems is well documented and now the same benefits are available in the form of an all natural topical cream. Used pre-operatively, twice a day, for seven days, Dermal-K has been shown to effectively reduce post-op bruising.

2 oz. jar

The Real Image Mirror™

Have you seen yourself the way others see you?

The Real Image Mirror™

- A positive real image of the patient - reversed from standard mirrors.
- Allows patients to see themselves as they are seen by others.
- Allows patient to see their facial asymmetries.
- Prevents an “unhappy” patient post-operatively from thinking YOU caused their naturally existing asymmetry.
- Hand-held and portable.
- “First surface” mirror eliminates distortion of the reflection.

Swiss Therapy™

Masks and Pads

Invotec's Swiss Therapy™ Masks and Pads are used as a lightweight and flexible cold compress during and after cosmetic procedures of the face. Synthesized in Switzerland of a patented Hydrogel material, Swiss Therapy is similar to natural tissue, making the product comfortable and highly compliant.

Blepharoplasty • Rhinoplasty • Laser Skin Resurfacing • Dermabrasion

- *Moist, but not wet*
 - *Lightweight & very comfortable*
 - *Cools by contact & evaporation*
 - *Gently pliable and conforming*
- *Non-adherent*
 - *Highly patient compliant*
 - *Convenient, easy to use*
 - *Sterile - 2 year shelf life*

Swiss Therapy™ Masks

Swiss Therapy™ Masks, used after cosmetic procedures, are a cooling PostOP compress for eye lid surgery such as Blepharoplasty. While comforting to the patient, it reduces redness and swelling, increasing the patient's satisfaction.

Gentle Comfortable Cooling

LASER & IPL Skin Therapy with Swiss Therapy™

Use Swiss Therapy™ pads during skin resurfacing with Laser and IPL¹ to ensure even cooling of a large area and prevent erythemas formation. Optimize the treatment period and therapeutic outcome with Swiss Therapy from Invotec.

*Increased epidermal transparency
Improved visibility of skin structure
Better penetration of the site
Reduces scatter of laser light
Less than 1% power loss
Soothing to skin*

¹Swiss Therapy Pads can be used with all laser systems (Q-switched, pulsed) and arc lamps in a wavelength range of 400-1100nm without affecting transmission of the laser energy. Swiss Therapy should not be used with wavelengths less than 400nm or more than 1100nm or in laser therapies using lasers with integrated, liquid coolant based cooling systems.
